TESTING & INSPECTION SERVICES

ABOUT AMSPEC

AmSpec, an international independent Inspection and Testing company headquartered in Cranbury, NJ, USA has serviced the Petroleum, Chemical, Gas, Asphalt & Agricultural industries since 1986. AmSpec operates state of the art testing facilities throughout the Continental United States, Canada, Caribbean, Europe, Asia, Africa, Central & South America and Australia.

Focused on your supply chain, no matter the geography, commodity or market, AmSpec are supporting the reliable and seamless transaction of bulk and container shipments. Staying ahead of emerging issues in the agricultural products sector, our expert compliance team meet the demands of complex local and global criteria to reduce the risks associated with shipping.

SERVICE FEATURES

WHY AMSPEC ?

AmSpec is the fastest growing independent Testing, Inspection and Certification provider. We have expanded to over 160 locations in over 50 countries worldwide to provide the highest level of service, wherever you, the customer require it.

With more than 35 years of experience in the industry, we have the best tools to help you improve your business 24 hours a day, 7 days a week.

TESTING & INSPECTION SOLUTIONS

INSPECTION SOLUTIONS

- Pre-shipment assessment and verification of product at origin, including compliance with shipping marks and tally specifications.
- Sampling of export cargo loading into bulk vessels and shipping containers to verify condition of goods.
- Verification of weight via shore scale, weighbridge or evaluation by independent calculation.
- Marine related survey including hold cleanliness and on-hire & off-hire survey.
- Vessel loading and discharge supervision.
- Storage management, inventory control and stock monitoring.

ANALYTICAL SERVICES

- AmSpec provides a wide range of reliable, timely and unbiased analytical services. Our highly-trained and experienced lab staff and state of the art laboratories ensure that the analyses are performed with the highest level of quality, accuracy and precision.
- AmSpec laboratories are located in close proximity to main work sites, minimizing turnaround time and allowing competitive services without compromise.
- AmSpec laboratories are "ISO/IEC 17025" accredited, offer cargo quality specifications against local and international standards and always adhere to the latest market regulations.

CERTIFICATION SOLUTIONS

AmSpec's trade services are focused on the timely and accurate production of trade related documentation and ensure certificates are issued in-line with sales contracts or Letters of Credit requirements.

RISK MANAGEMENT

- Full Outturn Guarantee (FOG) – Guaranteeing the outturn weight between loading and discharge of the cargo
- Fumigation
- Stock monitoring (SMA)
